

Tqind – Tranquillity Index Pilot

Hammersmith & Fulham • Lyric Square case study

Mission: We bring people out to experience the world around them.

Summary

Tqind provides a simple score (0–100) showing how calm and enjoyable urban spaces feel. This page compares Lyric Square with nearby locations using indicative scores to demonstrate reporting. Artificial ‘fake’ trees at Lyric Square produced a modest uplift, while natural green space remains strongest.

Findings

Location	Baseline	After intervention	Difference
Lyric Square	42	50	+8
Ravenscourt Park	78	–	–
King Street	35	–	–

Conclusion

Artificial trees improved Lyric Square modestly (+8 points). Ravenscourt Park’s higher and more stable score underscores the value of real greenery, shade, and reduced noise. Tqind quantifies these effects so boroughs and businesses can prioritise the most effective interventions.
